Subject: East Chicago Comments for Notification and Q&A

All,

I've attached the commented documents for the phone notification and the Q&A.

I know there is not currently a method for which the EPA plans to release the FAQs, but East Chicago has internally had discussions about providing information for residents on the City's website. These FAQs seem to be a good starting point for that communication. Our concern is that residents who are not able to attend the open house and inevitably read about lead in the drinking water in the paper will surely have questions and we would like to have something available to answer them as soon as possible. We understand there will need to be edits and additions to the FAQs as people start asking more questions, but it would be ideal for the City to have FAQs available to post on the City's website by the time of the open house.

Thanks,

Diana Schmoe
Project Engineer
